NEW ELECTRODE ENGINEERED FOR LOW TEMPERATURE STRESS RELIEF

Fort Loramie, OH - Select-Arc, Inc. has introduced **Select 70C-6 SR, an E70C-6MJ-H4 gas-shielded, metal cored electrode that is specifically designed for low temperature service requirements.**

Select 70C-6 SR is an uniquely formulated metal cored wire that provides excellent weldability with a low slag, resulting in an exceptionally smooth arc transfer with outstanding arc stability. This electrode also delivers robust mechanical properties at subzero temperatures as low as -60°F in both the as-welded and stress relief condition.

Select 70C-6 SR is ideal for a wide variety of welding applications including rootpass welding of process piping, pressure vessel fabrication, general fabrication, structural steel and construction equipment.

This premium electrode is available in .045", .052" and 1/16" diameters.

For more information on **Select 70C-6 SR, contact Select-Arc at 1-800-341-5215 or visit our website at www.select-arc.com.**
