SELECT-ARC EXPANDS FULL LINE CATALOG ELECTRODE SELECTIONS

Fort Loramie, OH - Select-Arc, Inc. has added fourteen new welding electrodes to its updated Full Line Catalog, which describes the company's complete line of premium flux cored and metal cored welding electrode products.

This 108-page catalog provides detailed information on over 180 Select-Arc carbon steel, low alloy, stainless steel, nickel alloy and hardsurfacing electrodes. The catalog offers extensive information including descriptions, classifications, shielding gases, welding positions, characteristics, typical mechanical properties, typical deposit compositions and applications.

New to this version is the introduction of two T8 welding wires, Select 78 and Select 78Ni1.

In addition, this literature features convenient Electrode Comparability Charts, Welding Parameters, Agency Approvals and Electrode Packaging options.

For more information on the latest Select-Arc Full Line Catalog, contact Select-Arc at 1-800-341-5215 or visit our website at www.select-arc.com.
