Select 111-K3C

Low Alloy / Gas Shielded / Flux Cored

FEATURES

- Intended for single and multiple pass welding of structural steel and fabrications utilizing high strength, low alloy steels, such as HY-100, ASTM A514, A633, and A710
- Designed for use with 100% CO2 shielding gas where the arc transfer mode is a smooth ball transfer that produces minimal spatter.
- Typical applications include low temperature storage tanks, offshore drilling rigs, shipbuilding, and construction machinery.
CONFORMANCES

* WFS = Wire Feed Speed, CTWD = Contact Tip To Work Distance
**The parameters listed are recommended starting points of operation and the ranges for amperage, wfs, and voltage could be extended based on fitness for application. For products with "all-position" capability, as determined and listed in classification, the position recommendation can be determined based on operator skill and material thickness and isn't limited to the listing.
