

# Select ER409Cb

Stainless Steel / Gas Shielded / Solid

PRODUCT DATA SHEET

## FEATURES

- Columbium (Cb), also known as niobium (Nb), is used to prevent weld metal sensitization.
- Nb stabilization promotes enhanced weldability on components where cleanliness can be an issue (i.e. excessive debris, oil, etc.).
- Unique manufacturing techniques provide enhanced arc stability and stable feeding.
- Applications for this alloy type include ferritic stainless steel exhaust system components, converters, mufflers, and tubing of similar composition where heat and corrosion resistance are necessary.
