

Select 8000-SR

Low Alloy / Gas Shielded / Flux Cored

PRODUCT DATA SHEET

FEATURES

- Designed for welding high strength, low alloy steels that require exceptional low temperature toughness in the as-welded or stress relieved conditions.
- Maintains tensile strength and high toughness at low temperatures after long term or repeated post weld heat treatment cycles.
- Ideal for pressure vessels, storage tanks, flanges, and valves, and piping and repair applications.
- Maintains low hardness in the as-welded and PWHT conditions

Notice: Be sure to follow all your employers safety practices, policies and procedures when using this product. Refer to CSA W117.2 and ANSI Z49.1 Safety in Welding, Cutting and Allied Processes for further information and the manufactures SDS sheet. The results reported are based upon testing of the product under controlled laboratory conditions in accordance with American Welding Society Standards. Actual use of the product may produce different results due to varying conditions. An example of such conditions would be electrode size, plate chemistry, environment, weldment design, fabrication methods, welding procedure and service requirements. Thus the results are not guarantees for use in the field. The manufacturer disclaims any warranty of merchantability or fitness for any particular purpose with respect to its products.
