

SelectAlloy 16-8-2-C

Stainless Steel / Gas Shielded / Metal Cored

PRODUCT DATA SHEET

FEATURES

- Alloyed to produce good hot-ductility properties for resistance against weld or crater cracking under restraint conditions despite a typical ferrite number (FN) of the weld deposit of <5FN.
- Metal cored benefits include the ability to successfully bridge gaps when part fit up is not as designed, higher travel speeds with subsequent lower heat inputs at equal amperages, and ability to join thin materials.
- Applications for this alloy type include welding stainless steel grades such as 16-8-2, 316, and 347 in high-pressure, high-temperature piping systems.

CONFORMANCES

AWS A5.22	EC16-8-2
ASME SFA 5.22	EC16-8-2
ASME Section IX	A8

DIAMETERS (in [mm])

Notice: Be sure to follow all your employers safety practices, policies and procedures when using this product. Refer to CSA W117.2 and ANSI Z49.1 Safety in Welding, Cutting and Allied Processes for further information and the manufactures SDS sheet. The results reported are based upon testing of the product under controlled laboratory conditions in accordance with American Welding Society Standards. Actual use of the product may produce different results due to varying conditions. An example of such conditions would be electrode size, plate chemistry, environment, weldment design, fabrication methods, welding procedure and service requirements. Thus the results are not guarantees for use in the field. The manufacturer disclaims any warranty of merchantability or fitness for any particular purpose with respect to its products.
