

# SelectAlloy 625-AP

Nickel Alloy / Gas Shielded / Flux Cored

PRODUCT DATA SHEET

## FEATURES

- Designed for welding in all positions with excellent slag release in both 75-80% Ar/balance CO<sub>2</sub> or 100% CO<sub>2</sub> shielding gas
- Iron (Fe) is less than 1 wt% to further enhance corrosion resistance.
- Exceptional mechanical properties and low temperature ductility make this product suitable for welding 9% Ni-steels for cryogenic service.
- Can be used to clad the surface of carbon steels to impart superior corrosion resistance and for joining nickel based alloys to steel.
- Typically used in marine applications for corrosion resistance, for cladding heat exchange and reactor vessels, and for welding LNG storage and conveyance equipment.

\* WFS = Wire Feed Speed, CTWD = Contact Tip To Work Distance

\*\*The parameters listed are recommended starting points of operation and the ranges for amperage, wfs, and voltage could be extended based on fitness for application. For products with "all-position" capability, as determined and listed in classification, the position recommendation can be determined based on operator skill and material thickness and isn't limited to the listing.

Parameters were established in 75% Ar/25% CO2. Raise by 1-1.5 volts when using 100% CO2.
